Subject: Article in Mason Valley News

This article was in the Mason Valley News this week. If you remember L. Wright was the Yerington Paiute Tribe's Environmental Director for a time.

My understanding is the site can be re-mined even if it is listed on the NPL.

I would appreciate any comments regarding her article.

NDEP has reached out to our group, YCAG, Jim Sanford's group and the Tribe. They want to meet with each of our groups separately (probably a good idea) to hear our comments on listing the site. Greg Lovato is setting the meetings to gather information for Gov. Sandoval.

Ours will most likely be Tuesday, January 19th.

Take care and I look forward to comments on Lauryne's article.

Peggy

Wright: What's best for Anaconda Mine might well be mining

You've got to hand it to EPA. It finally gets around to another attempt at listing Yerington's Anaconda Mine on the National Priorities List for cleanup pursuant to the Comprehensive Environmental Response,
